In a world where the ONLY constant is the permanent change, more than ever we need a team, especially a Multidisciplinary Team!

WHY DO WE NEED A MULTIDISCIPLINARY TEAM??

Because a Multidisciplinary Team is a Synergy, where one plus one is three or four or five...

WHY DO WE NEED A MULTIDISCIPLINARY TEAM??

Because it is a sum of knowledge in various areas, representing the accumulation of years of experiences, as well as a fusion of minds with different point of views, which is giving us a totally new perspective on the world!

WHY DO WE NEED A MULTIDISCIPLINARY TEAM??

From the beginning, *Romanian Journal of Clinical and Experimental Dermatology (RoJCED)* has been publishing articles written not only by dermatologists, but also by plastic surgeons and endocrinologists, gynecologists and dentists, oncologists and general surgeons, pathologists and medical students, because knowledge and experience sharing is our vision!

In 2018, *RoJCED* will continue the mission of spreading and promoting research, increasingly improving the quality of care and developing new multidisciplinary teams!

HAPPY NEW YEAR!
